

LIVELY PLANT MELODY

As the tomatoes grow slowly, waiting for their blossom.

The wind blows away their blossom, as the wind whistles its song...

As the plants wait to blossom...as the tomatoes grow so slowly...

By them all is the BIG HUGE PLANT growing up to 2 and a half feet tall.

The wind may push on it...

The mist may circle it...

And the BEAUTIFUL caterpillars may make a cocoon on it to become

Even prettier animal...

It won't fall down. The deer may chew on it but It wont fall down.

The plants watch the wind and mist circle around it in silence...

They live by the tomatoes helping them grow as they whistle their lively plant melody.
